FR calculates the EAC as per the ASISA standard for a period of 3 years up till the most recent TER reporting period.

Access the FR Privacy Policy and the FR Terms and Conditions on the FR website (www.fundrock.co.za). A money market portfolio is not the same as a bank deposit account. The price is targeted at a constant value. The total return to the investor is made up of interest received and any gain or loss made on any particular instrument. In most cases the return will merely have the effect of increasing or decreasing the daily yield, but that in the case of abnormal losses it can have the effect of reducing the capital value of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and in such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. The yield is calculated using an annualised seven day rolling average.
