INVESTMENT STRATEGY

The fund targets a return, net of fund management fees, of inflation plus three percent over a three year period whilst actively minimising the level of risk. To achieve this, a multi manager approach is used to benefit from a combination of fund managers that complement each other in their investment styles and processes. The fund is managed actively to enhance returns by allocating capital to asset classes based on valuations and long term potential growth. Risk is managed by diversifying the capital between different asset classes and fund managers. The fund will never have an equity exposure of more than 40%.

RISK PROFILE

This portfolio has low or no equity exposure, resulting in far less volatility than more aggressive mandated portfolios and in turn the probability of a long-term capital loss is much less likely. However, expected potential long term investment returns could be lower over the medium to long term. Where the asset allocation contained in this MDD reflect offshore exposure, the portfolio is exposed to currency risks. The portfolio is exposed to default and interest rate risks. Therefore, it is suitable for short to medium term investment horizons.

TOTAL EXPENSE RATIO (TER) AND TRANSACTION COST (INCLUDING VAT)

A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The TER and Transaction Costs cannot be determined accurately because of the short life span of the Fund. Calculations are based on actual data where possible and best estimates where actual data is not available. The TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 31 August 2017, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 30 September 2017. **Effective Annual Cost ("EAC"):** Boutique Collective Investments adopted the ASISA Standard on Effective Annual Cost ("EAC"). The EAC measure allows you to compare charges on your investments as well as their impact on your investment returns prior to investing. For further information regarding the ASISA Standard on Effective Annual Cost and access to the EAC calculator please visit our website at www.bcis.co.za
