INVESTMENT STRATEGY

Investments to be included may, apart from assets in liquid form, consist solely of participatory interests in portfolios of collective investment schemes investing in equity securities, property shares, property related securities, non-equity securities, bonds, preference shares and money markets instruments. The underlying portfolios of collective investment schemes will be registered in South Africa or other similar schemes operated in territories with a regulatory environment which is to the satisfaction of the manager and trustee of a sufficient standard to provide investor protection at least equivalent to that in South Africa and which is consistent with the portfolio's primary objective. The Manager shall have maximum flexibility in terms of asset allocation and shall not be precluded from continually varying the underlying exposure to equity securities, non-equity securities, bonds, preference shares, property and money market portfolios and assets in liquid form.

RISK PROFILE

This portfolio holds more equity exposure than any other risk profiled portfolio and therefore tend to carry higher volatility due to high exposure to equity markets. Expected potential long term returns could be higher than other risk profiles and in turn the risk of potential capital losses is higher. Where the asset allocation contained in this MDD reflect offshore exposure, the portfolio is exposed to currency risks. Therefore, it is suitable for long term investment horizons.

Up to 0.15%	Up to 0.85%	Up to 0.00%	Up to 0.00%	Up to 1.00%

TOTAL EXPENSE RATIO (TER) AND TRANSACTION COST (INCLUDING VAT)

A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The TER and Transaction Costs cannot be determined accurately because of the short life span of the Fund. Calculations are based on actual data where possible and best estimates where actual data is not available. The TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 31 August 2017, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 30 September 2017. **Effective Annual Cost ("EAC"):** Boutique Collective Investments adopted the ASISA Standard on Effective Annual Cost ("EAC"). The EAC measure allows you to compare charges on your investments as well as their impact on your investment returns prior to investing. For further information regarding the ASISA Standard on Effective Annual Cost and access to the EAC calculator please visit our website at www.bcis.co.za
