

INVESTMENT OBJECTIVE

The Anchor BCI Equity Fund is a general equity portfolio that seeks to sustain high long-term capital growth.

INVESTMENT PHILOSOPHY

The portfolio is constructed from bottom-up, fundamental research with an investment philosophy that favours quality stocks with superior returns on capital, cash flows and pricing power. While acceptable valuation is an important component of the stock-selection process, the fund's style is not "value" – investments will be made in premium-rated stocks where the growth outlook and quality profile warrants it. The fund will also own shares that are often not well researched, yet offer exceptional valuation-driven opportunities. The quality of companies included is judged by rates of earnings growth, return on capital employed, cash conversion and stability of margins. The portfolio may, from time to time, invest in listed and unlisted financial instruments. The manager may include the following unlisted financial instruments: forward currency, interest rate and exchange-rate swap transactions for efficient portfolio management purposes. The portfolio's equity exposure will always exceed 80% of the portfolio's net asset value.

FUND MANAGER COMMENTARY AT 30 JUN 2018

The Anchor BCI Equity Fund increased by 1.5% in June, ahead of the JSE Capped Swix benchmark (0.7%). The fund is down 0.9% YTD against the benchmark's performance of a negative 5.9%. Whilst it is gratifying to do comparatively well, it is frustrating for that performance not to flow through to being absolutely rewarding. World markets (down 0.5% YTD) continue to tread water as pundits observe strong global growth and corporate earnings, but ponder over whether US President Donald Trump's actions, which could spark trade wars, are political posturing or have irrational growth-denting intentions. In SA, June was all about three things – the rand which weakened by over 8% against the US dollar, Naspers which was up c. 15% and miners, which rose by 5%-plus MoM in many cases. SA Inc. continued to languish.

On balance, we had the right exposure and, while we do not necessarily discount an SA-Inc. bounce back, our exposure was also intentionally selective. In fact, during the month we nibbled on some beleaguered industrials, purchasing a small basket of Barloworld, Imperial and Bidvest. We also took smallish positions in MTN and Vodacom, where plummeting prices went far enough through our fair-value estimates to trigger a response.

Despite the flat market, there are some interesting stories emerging: Vodacom has declined from R180 to R120/share; The implied PE of Outsurance in RMI is now 10x; Barclays Africa now trades at a forward 7.5x PE and 7.7% DY; reasonable quality property companies trade at >10% yields; Exxaro trades at a forward 7.6x PE and 5% dividend yield, and Sasol looks cheap.

RISK PROFILE: HIGH

	Low	Mod-Low	Mod	Mod-High	High
<ul style="list-style-type: none"> This portfolio has a higher exposure to equities than any other risk profiled portfolio and therefore tend to carry higher volatility due to high exposure to equity markets. Expected potential long term returns are high, but the risk of potential capital losses is high as well, especially over shorter periods. Where the asset allocation contained in this MDD reflect offshore exposure, the portfolio is exposed to currency risks Therefore, it is suitable for long term investment horizons.

MARKET COMMENTARY

On the international front, the US eked out positive returns in June, while most other markets retreated. The historic meeting between North Korean leader, Kim Jong-un and US President Donald Trump took place in Singapore on 12 June and was arguably the high point of the month before the possibility of trade wars moved back into focus and spoilt the party. Central banks were also in on the action during June, with the US Federal Reserve (Fed) delivering a much anticipated 0.25% rate hike, while the European Central Bank (ECB) announced plans to wind down its quantitative easing (QE) programme by year end, but maintain rates at current levels until at least 3Q19.

Emerging markets (EMs) were in the eye of the storm during June, with the Brazilian stock market down over 5% and the Shanghai Composite Index ending the month 8% lower. To make matters worse for China, economic data released during the month was disappointing, with industrial production and fixed-asset investment both coming in below expectations (the latter coming in at its slowest pace since 1999).

Oil prices were again higher in June as large drawdowns in US oil inventories surprised markets. US equities were higher for the month, with the S&P 500 dragged upwards by the interest rate sensitive real estate and consumer staples sectors, which benefited as risk aversion kept a lid on bond yields. The US dollar was also positive against most major currencies as the country's monetary policy continues to diverge from other major developed markets.

In SA, it was all about two factors – a 8% weakening of the currency and a 15% rise in Naspers (which comprises 20% of the All Share Index). The weaker currency fed through (positively and negatively) into share prices, with the FTSE JSE All Share Index (J203) gaining 2.6% MoM (down 3.2% YTD). Financial counters felt the most pressure with the FINI-15 dropping 2.8% MoM (-9.7% YTD), while Industrials closed 4.6% higher MoM (-4.7% YTD). Resource counters performed well as a rally in some commodity prices buoyed the Resi-10 to end June 6.4% in the green (the index is now up an impressive 16.1% YTD).

JSE earnings rose over 10% in the last 12 months and we expect earnings growth of 12% and 16% over the next 12 and 24 months, respectively. If SA economic growth accelerates, 2019 could see even higher growth rates. Following the 6% decline in the Capped Swix this year, many shares and sectors have moved into attractive territory. Risks have certainly increased, but all of the factors highlighted above indicate the potential for more positive returns than we have experienced over the last few years. Earlier in the year we had nudged equities to overweight (a 14% projected return) and we retain this positioning.
