Low Risk

This portfolio has no equity exposure, resulting in low-risk, stable investment returns. The portfolio is not directly exposed to currency risk, but it is exposed to default and interest rate risks. The portfolio is suitable for shorter-term investment horizons.

Investment Objective

The Fund is an enhanced income portfolio, seeking to provide its investors with a regular stream of income and preservation of capital. As a secondary objective, the portfolio targets a moderate level of capital growth over the long term.

Investment Universe

Investments to be included in the portfolio may, apart from assets in liquid form, consist of non-equity securities, equity securities, interest bearing securities (including, but not limited to, bonds, cash deposits and money market instruments), preference shares and property securities. The manager may invest in unlisted investments, as well as any other income enhancing securities which are considered consistent with the portfolio's primary objective and that the Collective Investment Schemes Act may allow.

Investor Profile

The Fund is suitable for investors with:

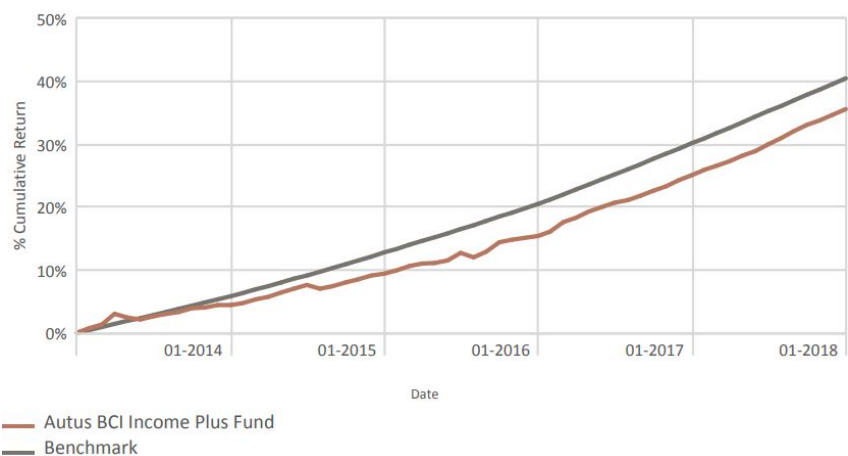

- A low appetite for market volatility.
- A regular income requirement.
- A short to medium term investment horizon.

Risks

Where foreign securities are included in the portfolio there may be additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. Certain investments - including futures, options, equity swaps, and other derivatives may give rise to substantial risk and might not be suitable for all investors.

Total Expense Ratio (TER)

Total Expense Ratio, expressed as a percentage of the fund, is a measure of the actual expenses incurred by the fund over the past financial year and is not an indication of the current fees charged to manage the fund. The TER includes the annual management fees, performance related fees (if any) as well as audit fees, trustee fees and the VAT payable on these components. It also includes the same for any underlying funds the fund may be invested in.

A higher TER does not necessarily imply a poor net return, in the same way that a low TER does not imply a good net return. The costs associated with managing a unit trust may vary from one year to the next, hence the reported TER at a given point in time may not be an accurate indication of future TERs.

Effective Annual Cost: Boutique Collective Investments adopted the ASISA Standard on Effective Annual Cost ("EAC"). The EAC measure allows you to compare charges on your investments as well as their impact on your investment returns prior to investing. For further information regarding the ASISA Standard on Effective Annual Cost and access to the EAC calculator please visit our website at www.bcis.co.za.

Transaction Cost (TC)

Transaction cost expressed as a percentage of the fund, is the total cost incurred in dealing in the underlying assets of the fund, which includes buys and sells in order to change portfolio positioning or to facilitate cash flow into or out of the fund. Incurring these costs is an inevitable part of managing a unit trust portfolio. The level of such costs over any particular period should be interpreted in the context of factors such as financial market events and volatility over the same period, the style of the investment manager, cash flow profile of the fund and the type of fund. E.g. dealing costs for money market or income funds are typically materially lower than for equity funds.

Total Investment Charge (TIC)

The Total Investment Charge, expressed as a percentage of the fund, relates to all investment costs of the fund. It is shown as the sum of the TER and TC.

With the exception of money market funds, all unit trust returns are quoted net of TIC, therefore these expenses should not be deducted again from published returns. Fund performance can therefore be assessed on a basis which already takes into account relative differences in TER and TC.

The TER and Transaction Cost calculations are based upon the portfolio's direct costs for the financial year ended 31 August 2017, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, which is 30 September 2017.

FAIS CONFLICT OF INTEREST DISCLOSURE

Please note that your financial advisor may be a related party to the co-naming partner and/or BCI. It is your financial advisor's responsibility to disclose all fees he/she receives from any related party. The portfolio's TER includes all fees paid to BCI, the trustees, the auditors, banks, the co-naming partner, underlying portfolios and any other investment consultants/managers as well as distribution fees and LISP rebates, if applicable. The portfolio's performance numbers are calculated net of the TER expenses. The investment manager earns a portion of the service charge and performance fees, if applicable. In some instances portfolios invest in other portfolios which form part of the BCI Scheme. These investments will be detailed in this document, if applicable. Additional information, including application forms, annual or quarterly reports can be obtained from BCI, free of charge or can be accessed on our website www.bcis.co.za. Valuation takes place daily and prices can be viewed on our website (www.bcis.co.za) or in the daily newspaper. Actual annual performance figures are available to existing investors on request. Upon request the Manager will provide the investor with portfolio quarterly investment holdings reports.
