RISK PROFILE: HIGH

- This portfolio has a higher exposure to equities than any other risk profiled portfolio and therefore tends to carry higher volatility due to higher exposure to equity market
- Expected potential long term returns are high, but the risk of potential capital losses is high as well, especially over shorter periods.
- Where the asset allocation contained in this MDD reflects offshore exposure, the portfolio is exposed to currency risks.
- Therefore, it is suitable for long term investment horizons.

FUND MANAGER COMMENTARY AT 29 FEB 2024

During 4Q23, one new holding, Fortinet, was added to the portfolio. The position was added following a 12% share price decline in response to Fortinet's September 2023 results. We used the share price weakness to start a small position in this best-in-class cybersecurity business. Two positions were exited over the quarter. The fund's equity content ended the quarter at 93.9%, down slightly from 94.9% at the end of September 2023 (3Q23). The balance of 6.1% was mainly in cash.
