IMALI FR PASSIVE BALANCED FUND (A)

INVESTMENT OBJECTIVE

The objective of the Imali FR Passive Balanced Fund is to offer investors a moderate to high long term total return mainly through the use of passive investment strategies.

INVESTMENT POLICY

The fund will mainly invest in exchange traded funds and index related securities. However, an active component may be included where deemed fit by the investment manager. Asset allocation and investment allocation factors may include factors such as market, defensive, quality, value and momentum strategies, and will be used with the aim to deliver better risk adjusted long term total returns than the market for similar risk profiled portfolios. The investment manager will apply and or rotate the factors and indices which they deem most appropriate to cater for the varying market conditions and investment cycles. The portfolio provides investors access to capital growth over the long term and may exhibit levels of volatility and possibly capital loss over the short term. The portfolio will be managed in compliance with prudential investment guidelines for retirement funds in South Africa to the extent allowed for by the Act with a maximum net equity exposure of 75% of the portfolio's asset value.

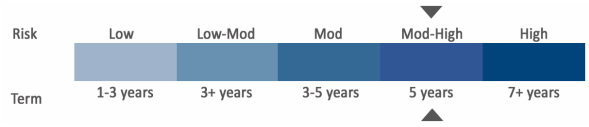
RISK PROFILE



Moderate - High Risk

- This portfolio holds more equity exposure than a medium risk portfolio but less than a high-risk portfolio. In turn the expected volatility is higher than a medium risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a medium risk portfolio, but less than a high-risk portfolio and the expected potential long-term investment returns could therefore be higher than a medium risk portfolio.
- Where the asset allocation contained in this MDD reflects offshore exposure, the portfolio is exposed to currency risks.
- The portfolio is exposed to equity as well as default and interest rate risks.
- Therefore, it is suitable for medium to long-term investment horizons.
- The portfolio may have a high exposure to derivative instruments, which may carry additional risks
