

Investec BCI World Axis Cautious Feeder Fund

Class A - GLOBAL MULTI ASSET LOW EQUITY

The portfolio manager is Investec Investment Management (Pty) Ltd - Authorised FSP 44897.
The fund is administered by Boutique Collective Investments.

31 January 2024 - Minimum Disclosure Document

Low to Medium Risk

- Where the asset allocation contained in this MDD reflects offshore and equity exposure, the portfolio is exposed to currency and equity risks
- The portfolio is exposed to default and interest rate risks
- Therefore, it is suitable for medium term investment horizons
- The expected potential long term investment returns are lower but less volatile over the medium to long term than higher risk portfolios

The Fund is FSCA Approved

Fund Characteristics and Objectives

The investment objective of the Investec BCI World Axis Cautious Feeder Fund (the "Fund") is to provide investors with capital growth over the long term and income, whilst aiming to outperform the stated fund benchmark with below benchmark risk over three year rolling periods. Short term performance may fluctuate from the benchmark performance. The portfolio will apart from assets in liquid form, invest solely in the participatory interests of the Investec World Axis Cautious Fund, a protected cell of Investec W&I International PCC Limited, domiciled in Guernsey. The underlying portfolio follows a multi asset class strategy and invests primarily in foreign collective investment schemes. The portfolio's net equity exposure will range between 15 and 40 of the portfolio's net asset value.

Our portfolio manager strives to outperform the benchmark over the longer term by focusing on:

- Selecting investment managers who provide returns in proportion with risk taken,
- Allocating assets based on our in house strategic view of the market environment,
- Blending investment managers appropriately in order to reduce risk without infringing on underlying performance,
- Performing a stringent due diligence on all investment managers that is based on both a qualitative and quantitative investment process.

Cumulative Return Chart (Class A, ZAR, Net of fees)

The chart represents the returns generated by a R100 investment made at inception. Investment performance is for illustrative purposes only and calculated by taking actual initial fees and ongoing fees into account for amount shown with income reinvested on reinvestment date.

Performance (Class A, ZAR, net of fees)

	3 Months	6 Months	1 Year	Since inception ²	Calendar High	Calendar Low
Investec BCI World Axis Cautious Feeder Fund	5.4%	7.6%	9.9%	16.0%	16.0%	11.7%
(ASISA) Global Multi Asset Low Equity	6.6%	7.1%	10.6%	13.7%	16.8%	7.9%

¹ The prior year ("PY") TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 30 June 2023, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 30 September 2023 | ² Annualised | ³ In certain instances, numbers may not sum correctly due to decimal rounding | ⁴ Other includes operational costs and TER paid to underlying managers incl. VAT | Where applicable the above information is sourced from: Investec Wealth & Investment and Morningstar | Since Inception is: 31 March 2022 | Method of calculation: NAV-NAV with gross income reinvested | Minimum Disclosure Document - 31 January 2024

FAIS Conflict of Interest

Please note that your financial advisor may be a related party to the co-naming partner and/or BCI. It is your financial advisor's responsibility to disclose all fees he/she receives from any related party. The portfolio's TER includes all fees paid by portfolio to BCI, the trustees, the auditors, banks, the co-naming partner, underlying portfolios, and any other investment consultants/managers as well as distribution fees and LISP rebates, if applicable. The portfolio's performance numbers are calculated net of the TER expenses. The investment manager earns a portion of the service charge and performance fees where applicable. In some instances portfolios invest in other portfolios which form part of the BCI Scheme.

Glossary Summary

Annualised return: Annualised return is the average return per year over the period.

The Effective Annual Cost ("EAC"): Boutique Collective Investments adopted the ASISA Standard on Effective Annual Cost ("EAC") for a period of 3 years up until the most recent TER reporting period. The EAC measure allows you to compare charges on your investments as well as their impact on your investment returns prior to investing. For further information regarding the ASISA Standard on Effective Annual Cost and access to the EAC calculator please visit our website at www.bcis.co.za

Method of calculation: Unit prices are calculated on a net asset value basis by determining the total market value of all assets in the portfolio, including any income accruals, less any permissible deductions.

The following costs may be deducted from the portfolio: brokerage fees, security services tax, audit or's fees, bank charges, trustee and custodian fees and the annual management fees of the manager.

NAV: The Net Asset Value (NAV) represents the value of the assets of a fund less its liabilities.

Total expense ratio (TER): The current TER cannot be regarded as an indication of future TER's. The TER and Transaction Costs cannot be determined accurately because of the short life span of the Fund. Includes the annual management fee, performance fee and administrative costs but excludes portfolio transaction costs (except in the case of an entry or exit charge paid by a fund when buying or selling units in another fund) expressed as a percentage of the average daily value of the Fund calculated over a rolling three years (or since inception where applicable) and annualised to the most recently completed quarter.

Transaction cost (TC): Transaction costs are a necessary cost in administering the Fund and impacts returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER Calculations are based on actual data where possible and best estimates where actual data is not available.

Total investment charge (TIC): This is the sum of the TER and TC.

Specific Fund Risks

Investments in general and foreign investments in particular involve numerous risks and might not be suitable for all investors. Where foreign securities are included in the portfolio there may be additional risks such as potential constraints on liquidity, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. Please refer to https://www.investec.com/en_za/investment/unit-trusts.html?t-5 for a list of Fund specific risk which should be considered by investors prior to investing.

Important information that should be considered prior to investing

Boutique Collective Investments (RF) (Pty) Ltd ("BCI") is a registered Manager of the Boutique Collective Investments Scheme, approved in terms of the Collective Investments Schemes Control Act, No 45 of 2002 and is a full member of the Association for Savings and Investment SA. Collective Investment Schemes ("CIS") are generally medium to long term investments and the Manager gives no guarantee with respect to the capital or the return of the Fund. CISs are traded at ruling prices and can engage in borrowing, up to 10% of fund net asset value to bridge insufficient liquidity, and scrip lending. A schedule of charges, fees and advisor fees is available on request from Fund Manager. Boutique Collective Investments (RF) Pty Ltd retains full legal responsibility for the third party named portfolio. Performance shown is that of the Fund and individual investor performance may differ as a result of initial fees, actual investment date, date of any subsequent reinvestment and any dividend withholding tax and past performance is not necessarily a guide to the future. Performance figures above are based on lump sum investments, using NAV to NAV figures net of fees with gross income reinvested, in South African Rands. The value of participatory interests or the investment may go up or down. Different classes of units apply to the Fund and the information presented is for the most expensive class. Fund valuation occurs at 08h00 (T+1) and transaction cut-off time is 14h00 SA time each business day. This fund may be closed to new investors in order to be managed in accordance with the mandate. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. A higher Total Expense Ratio (TER) does not necessarily imply a poor return, nor does a low TER imply a good return. Where funds invest in the participatory interests of foreign collective investment schemes these may levy additional charges which are included in the relevant TER. The ratio does not include transaction costs. The current TER cannot be regarded as an indication of the future TERs. Fund prices are published each business day in selected media. Additional information on the Fund, including information on the EAC can be obtained, free of charge, at https://www.investec.com/en_za/investment/unit-trusts.html?t-5. A feeder fund is a portfolio that invests in a single portfolio of collective investment schemes, which levies its own charges and which could result in a higher fee structure for the feeder fund.

DISCLAIMER

The Manager, PO Box 1655, Cape Town, 8000, Tel: 0860 500 100 is registered under the CIS Control Act. The scheme trustee is The Standard Bank of South African Limited, Telephone 021 441 4100.
