OUT OF THE ORDINARY

Investec FR World Axis Flexible Feeder Fund

Class A - GLOBAL MULTI ASSET FLEXIBLE

The portfolio manager is Investec Investment Management (Pty) Ltd - Authorised FSP 44897.
The fund is administered by Fundrock Collective Investments.

31 August 2026 - Minimum Disclosure Document

High Risk

- This portfolio has a higher exposure to equities than any other risk profiled portfolio and therefore tend to carry higher volatility due to high exposure to equity markets
- Expected potential long term returns are high, but the risk of potential capital losses is high as well, especially over shorter periods
- Where the asset allocation contained in this MDD reflect offshore exposure, the portfolio is exposed to currency risks
- Therefore, it is suitable for long term investment horizons

The Fund is FSCA Approved

Fund Characteristics and Objectives

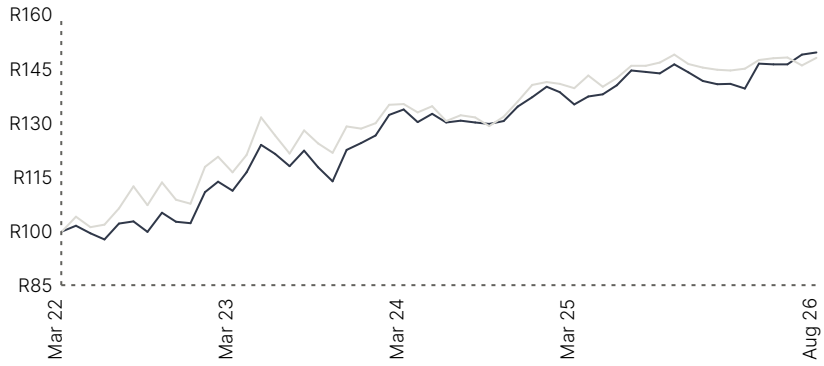
The investment objective of the Investec FR World Axis Flexible Feeder Fund (the "Fund") is to outperform the stated fund benchmark over three year rolling periods. Short term performance may fluctuate from the benchmark performance. The portfolio will apart from assets in liquid form, invest solely in the participatory interests of the Investec World Axis Flexible Fund, which is an Investec UCITS (Société d'Investissement à Capital Variable), an open-ended investment company incorporated and approved under the laws of the Grand Duchy of Luxembourg. The underlying portfolio follows a multi asset class strategy and invests primarily in foreign collective investment schemes. The portfolio's net equity exposure will range between 0 and 100 of the portfolio's net asset value.

Whereas the Fund does not seek to replicate the benchmark, the portfolio manager strives to outperform the benchmark over the longer term by focusing on:

- Selecting investment managers who provide returns in proportion with risk taken,
- Allocating assets based on our in house strategic view of the market environment,
- Blending investment managers appropriately in order to reduce risk without infringing on underlying performance,
- Performing a stringent due diligence on all investment managers that is based on both a qualitative and quantitative investment process.

The mandate of the Fund differs from other funds in the World Axis range of funds because it allows for greater flexibility in terms of tactical asset allocation. This means that the manager is not constrained by benchmark considerations when making asset allocation decisions.

Cumulative Return Chart (Class A, ZAR, Net of fees)



The chart represents the returns generated by a R100 investment made at inception. Investment performance is for illustrative purposes only and calculated by taking actual initial fees and ongoing fees into account for amount shown with income reinvested on reinvestment date.

Performance (Class A, ZAR, net of fees)

	YTD	1 Year	2 Years[2]	3 Years[2]	Since inception[2]	Calendar High	Calendar Low
Investec FR World Axis Flexible Feeder Fund	1.9%	1.5%	6.1%	5.0%	9.3%	19.3%	3.4%
(ASISA) Global Multi Asset Flexible	5.6%	3.8%	7.2%	6.9%	9.5%	21.6%	3.3%

[1] The prior year ("PY") TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 31 December 2025, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 30 June 2026 | [2] Annualised | [3] In certain instances, numbers may not sum correctly due to decimal rounding | [4] Other includes operational costs and TER paid to underlying managers incl. VAT | Where applicable the above information is sourced from: Investec Wealth & Investment and Morningstar | Since Inception is: 31 March 2022 | Method of calculation: NAV-NAV with gross income reinvested | Minimum Disclosure Document - 31 August 2026

FAIS Conflict of Interest

Please note that your financial advisor may be a related party to the co-naming partner and/or FR. It is your financial advisor's responsibility to disclose all fees he/she receives from any related party. The portfolio's TER includes all fees paid by portfolio to FR, the trustees, the auditors, banks, the co-naming partner, underlying portfolios, and any other investment consultants/managers as well as distribution fees and LISP rebates, if applicable. The portfolio's performance numbers are calculated net of the TER expenses. The investment manager earns a portion of the service charge and performance fees where applicable. In some instances portfolios invest in other portfolios which form part of the FR Scheme.

Glossary Summary

Annualised return: Annualised return is the average return per year over the period.

The Effective Annual Cost ("EAC"): Fundrock Collective Investments adopted the ASISA Standard on Effective Annual Cost ("EAC") for a period of 3 years up until the most recent TER reporting period. The EAC measure allows you to compare charges on your investments as well as their impact on your investment returns prior to investing. For further information regarding the ASISA Standard on Effective Annual Cost and access to the EAC calculator please visit our website at www.fundrock.co.za

Method of calculation: Unit prices are calculated on a net asset value basis by determining the total market value of all assets in the portfolio, including any income accruals, less any permissible deductions.

The following costs may be deducted from the portfolio: brokerage fees, security services tax, auditor's fees, bank charges, trustee and custodian fees and the annual management fees of the manager.

NAV: The Net Asset Value (NAV) represents the value of the assets of a fund less its liabilities.

Total expense ratio (TER): The current TER cannot be regarded as an indication of future TER's. The TER and Transaction Costs cannot be determined accurately because of the short life span of the Fund. Includes the annual management fee, performance fee and administrative costs but excludes portfolio transaction costs (except in the case of an entry or exit charge paid by a fund when buying or selling units in another fund) expressed as a percentage of the average daily value of the Fund calculated over a rolling three years (or since inception where applicable) and annualised to the most recently completed quarter.

Transaction cost (TC): Transaction costs are a necessary cost in administering the Fund and impacts returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER Calculations are based on actual data where possible and best estimates where actual data is not available.

Total investment charge (TIC): This is the sum of the TER and TC.

Specific Fund Risks

Investments in general and foreign investments in particular involve numerous risks and might not be suitable for all investors. Where foreign securities are included in the portfolio there may be additional risks such as potential constraints on liquidity, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. Please refer to https://www.investec.com/en_za/investment/unit-trusts.html?t-5 for a list of Fund specific risk which should be considered by investors prior to investing.

Important information that should be considered prior to investing

Fundrock Collective Investments (RF) (Pty) Ltd ("FR") is a registered Manager of the Fundrock Collective Investment Scheme, approved in terms of the Collective Investments Schemes Control Act, No 45 of 2002 and is a full member of the Association for Savings and Investment SA. Collective Investment Schemes in securities are generally medium to long term investments. The value of participatory interests may go up or down and past performance is not necessarily an indication of future performance. The Manager does not guarantee the capital or the return of a portfolio. Collective Investments are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees, charges and maximum commissions is available on request. FR reserves the right to close the portfolio to new investors and reopen certain portfolios from time to time in order to manage them more efficiently. Additional information, including application forms, annual or quarterly reports can be obtained from FR, free of charge.
Performance figures quoted for the portfolio is from Morningstar, as at the date of this document for a lump sum investment, using NAV-NAV with income reinvested and do not take any upfront manager's charge into account. Income distributions are declared on the ex-dividend date. Actual investment performance will differ based on the initial fees charge applicable, the actual investment date, the date of reinvestment and dividend withholding tax. Fundrock Collective Investments (RF) Pty Ltd retains full legal responsibility for the third party named portfolio.

Although reasonable steps have been taken to ensure the validity and accuracy of the information in this document, FR does not accept any responsibility for any claim, damages, loss or expense, however it arises, out of or in connection with the information in this document, whether by a client, investor or intermediary. This document should not be seen as an offer to purchase any specific product and is not to be construed as advice or guidance in any form whatsoever. Investors are encouraged to obtain independent professional investment and taxation advice before investing with or in any of FR/the Manager's products. A feeder fund is a portfolio that invests in a single portfolio of collective investment schemes, which levies its own charges and which could result in a higher fee structure for the feeder fund.

Different classes of units apply to the Fund and the information presented is for the most expensive class. Fund valuation occurs at 08h00 (T+1) and transaction cut-off time is 14h00 SA time each business day. This fund may be closed to new investors in order to be managed in accordance with the mandate. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. A higher Total Expense Ratio (TER) does not necessarily imply a poor return, nor does a low TER imply a good return. Where funds invest in the participatory interests of foreign collective investment schemes these may levy additional charges which are included in the relevant TER. The ratio does not include transaction costs. The current TER cannot be regarded as an indication of the future TERs. Fund prices are published each business day in selected media. Additional information on the Fund, including information on the EAC can be obtained, free of charge, at https://www.investec.com/en_za/investment/unit-trusts.html?t-5.
