

## INVESTMENT OBJECTIVE

The objective is to identify the best investment opportunities in predominantly the domestic equity market and in doing so deliver long term capital growth and income.

## INVESTMENT UNIVERSE

The portfolio's investment strategy focuses on individual stock selection from a bottom-up basis rather than a top-down investment process. The benchmark will be the JSE All Share Index. The manager will aim to identify special opportunities, including companies with potential for increasing dividend yields, companies with attractive return on equity ratios or potential to have strong return on equity ratios and other opportunities where the intrinsic value has not been fully recognized in the share price. The portfolio's equity exposure will always exceed 80% of the portfolio's net asset value with the maximum offshore exposure as per regulatory limits. The portfolio may from time to time invest in listed and unlisted financial instruments such as forward currency, interest rate and exchange rate swap transactions for efficient portfolio management purposes.
