

SESEFIKILE BCI PROPERTY FUND (B1)

Minimum Disclosure Document (Fund Factsheet)

FUND OBJECTIVE

The Sesfikile Boutique Collective Investments Property Fund Class B2 is a portfolio which aims to deliver both a high income yield as well as capital growth over the medium to long term. Our objective is to deliver total returns (consisting of income and capital) that outperform the FTSE/JSE All Property Index (J803) over a 3 to 5 year investment horizon. The fund is suitable for investors who are looking for a viable property component to a balanced portfolio; or alternatively an investor looking for a growing income stream but is willing to be exposed to an element of capital volatility. The portfolio may from time to time invest in listed and unlisted financial instruments.

FUND STRATEGY

This fund aims to outperform the benchmark by investing in listed property companies with sustainable income growth underpinned by strong property fundamentals. In addition to these core holdings, the fund makes use of tactical stock selection to capitalise on short-term market mispricing and corporate action opportunities.

INVESTMENT POLICY

The policy is to invest in JSE listed Real Estate Investment Trusts (“REITs”) or listed property companies. The investment manager will also be allowed to invest in financial instruments and cash as allowed by the act from time to time in order to achieve its investment objective. Furthermore, and as legislation permits, the manager shall be permitted to invest in offshore listed property investments on behalf of the Sesfikile BCI Property Fund.

WHY CHOOSE THIS FUND

The fund offers active best of breed management within a sector that offers income and capital growth over time:

- All shares are subject to rigorous, in-depth research;
- While ultimate portfolio construction adheres to Sesfikile’s unique “Four D” approach:
 - Our passion for direct property
 - Getting stuck in the detail
 - Understanding the broader drivers of property investment
 - Taking views on corporate action deals and finding the hidden potential in the sector.
- Through extensive experience in the listed property sector, we believe our team has the ability to identify the key differentiators to performance and ultimately the factors that impact total returns for clients. Importantly, given our commitment to capping the total size of assets under management we will remain nimble enough to execute on investment ideas effectively over the medium to long term.
- Since inception, our investment process has been able to deliver consistent low-risk outperformance of the benchmark on an after-fee basis. Although this is no guarantee of future performance, we are confident in our robust investment and risk management process and alignment of interest with clients will consistently steer us towards identifying value added investment opportunities.

FUND MANAGER INFORMATION

Evan Jankelowitz, Mohamed Kalla and Naeem Tilly co-manage the Sesfikile BCI Property Fund.

The Sesfikile Investment Team, which consists of five individuals, boasts combined experience of more than 70 years in the listed property sector, making them amongst the most experienced teams in the market. Since inception, the Team has been able to deliver consistent benchmark and peer relative outperformance.

MARKET REVIEW

Listed property (ALPI) returned +0.68% in December to top off a stellar year where it was amongst the best asset classes globally, finishing 2024 up +29.81%. Listed property outpaced both bonds (ALBI: Dec -0.32%; 2024 +17.2%) and equities (ALSI: -Dec -0.29; 2024 13.4%) for December and the calendar year. Bonds struggled in December as the Trump victory in the US created inflationary fears and led to a global expansion in bond yields, with our local 10-year bond moving out 20bps to 10.29%, despite the local inflation prints being contained. Equities suffered a similar fate in December as the inflationary fears caused havoc with the banks and retailers. However, the weaker rand helped most miners limit the route.

MAS Real Estate was the best-performing stock for a second month in a row, presumably still off the back of high expectations that an agreement would be made with Prime Kapital to acquire Development Joint Venture and resume paying a distribution. Towards the latter part of the month, it was announced that the results of the discussion would only be released in 2025 and not by year-end as expected. They also announced the disposal of a portfolio of Romanian strip malls for EUR48 million, which was marginally (3.1%) ahead of book value and, ironically, did not move the price. There was very little other noteworthy company news, barring a solid pre-close presentation from SA Corporate.

We are delighted that our initial expectations for the sector’s total return were surpassed and that we could deliver both healthy beta and alpha to our client base. And while our initial forecasts were beaten, it was justified through the unraveling of several positive tailwinds along the way.

We are still positive into 2025 with a steadily improving earnings growth outlook and healthy balance sheets lending to the possibility of accelerating acquisitive growth, which has been subdued for several years. We are weary of the Trump policies and their impact on global inflation and emerging markets and, therefore, have been more conservative on our bond yield forecasts. Total returns will be more modest than in 2024, however low double-digit returns are still feasible.

TER AND TRANSACTION COST (INCL. VAT)

Please note: A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The prior year ("PY") TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 31 December 2023, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 30 September 2024.
