### Investment Objective

The Southern Charter BCI Worldwide Flexible Fund of Funds primary objective is to generate moderate to high long term total returns. The fund aims to provide investors with capital growth above inflation by investing in a combination of asset classes including local and international equities, fixed interest, property and cash. The manager shall have maximum flexibility in terms of asset allocation and shall not be precluded from continually varying the underlying exposure to both local and offshore assets such as equities, non-equity securities, bonds, preference shares, property, fixed interest, money market portfolios and assets in liquid form. This fund is NOT Regulation 28 compliant and therefore will reflect our best unconstrained asset allocation strategy. It is ideal for investors with discretionary funds and who are willing to have a high exposure to offshore assets.

### Strategy

The Fund is actively managed and reflects our best unconstrained asset allocation strategy.

## Medium | Medium - High Risk

This portfolio holds more equity exposure than a medium risk portfolio but less than a high-risk portfolio. In turn the expected volatility is higher than a medium risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a medium risk portfolio, but less than a high-risk portfolio and the expected potential long term investment returns could therefore be higher than a medium risk portfolio. Where the asset allocation contained in this MDD reflect offshore exposure, the portfolio is exposed to currency risks. The portfolio is exposed to equity as well as default and interest rate risks. Therefore, it is suitable for medium to long term investment horizons.

## Total Expense Ratio (TER)

A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The prior year ("PY") TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 30 June 2023, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 30 September 2023.

## Effective Annual Cost

Boutique Collective Investments adopted the ASISA Standard on Effective Annual Cost ("EAC"). The EAC measure allows you to compare charges on your investments as well as their impact on your investment returns prior to investing. BCI calculates the EAC as per the ASISA standard for a period of 3 years up till the most recent TER reporting period. For further information regarding the ASISA Standard on Effective Annual Cost and access to the EAC calculator please visit our website at [www.bcis.co.za](http://www.bcis.co.za).

**#Fixed Administration Fee:** R15 excluding VAT. (Applies to all accounts with balances of less than R100 000 at month end.)

## FAIS Disclosure

Please note that your financial advisor may be a related party to the co-naming partner and/or BCI. It is your financial advisor's responsibility to disclose all fees he/she receives from any related party. The portfolio's TER includes all fees paid by portfolio to BCI, the trustees, the auditors, banks, the co-naming partner, underlying portfolios, and any other investment consultants/managers as well as distribution fees and LISP rebates, if applicable. The portfolio's performance numbers are calculated net of the TER expenses. The investment manager earns a portion of the service charge and performance fees where applicable. In some instance portfolios invest in other portfolios which forms part of the BCI Schemes. These investments will be detailed in this document, as applicable.
