

INVESTMENT OBJECTIVE

The Stonewood BCI Global Equity Feeder Fund aims to earn over the medium to long term a higher total rate of return than world equity markets without greater risk of loss and to offer investors offshore diversification through global markets exposure.

INVESTMENT UNIVERSE

The portfolio will apart from assets in liquid form, invest solely in the participatory interests of the Stonewood Global Equity Fund, a cell of the Stonewood Global Fund PCC Limited, established in Guernsey. The underlying portfolio invests mainly in equity, non-equity securities and interest bearing instruments as well as participatory interests of underlying portfolios of collective investment schemes or other similar schemes that provide exposure to equity investments and other growth asset classes across all market sectors. To the extent that the assets in the portfolio are exposed to exchange rate risk, the manager may enter into financial transactions for the exclusive purpose of hedging such exchange rate risk subject to the conditions and limits as stipulated by the Act. The portfolio's minimum equity exposure is 90% of its net asset value.

RISK PROFILE

High Risk

- This portfolio has a higher exposure to equities than any other risk profiled portfolio and therefore tends to carry higher volatility due to high exposure to equity markets.
- Expected potential long term returns are high, but the risk of potential capital losses is high as well, especially over shorter periods.
- Where the asset allocation contained in this MDD reflects offshore exposure, the portfolio is exposed to currency risks.
- Therefore, it is suitable for long term investment horizons.
